

MAC monitor adapter: old Apple monitor to PC or G3 G4 G5

Product number M-2999

Product description

Adapter to connect original Apple monitors with G3/G4/G5 or PCs, DB15 female to an HDDB15 male, PnP, e.g. for Apple 17" or 20" displays

partsdata tips

The monitor adapter offered here makes it possible to connect very old Apple monitors (with the two-row Apple DSub-15 connector) to more current HD DSub-15 ports (three-row, VGA). This allows old analogue monitors to continue to be used on 'newer' Macintosh computers or PC systems. The adapter can be screwed to the PC and also the monitor cable to the adapter, therefore you have a reliable connection.

Technical data

- Monitor adapter for old Apple Macs
- RARITY: partsdata has it.
- Technology: pure analogue, VGA
- HD-DSub-15 plug (male) can be screwed on (VGA)
- DSub-15 socket with threaded bolt
- Moulded adapter housing
- e.g. for (very) old Apple monitors to new computers
- Branded product / Manufacturer Pekingstone
